SUMMARY

Flutter Developer skilled in building high-performance cross-platform mobile applications. Proficient in Flutter, Dart, Firebase, and REST API integration with strong problem-solving and clean architecture principles. Experienced in developing production-ready apps with real-time databases, authentication, responsive UI, and scalable state-management.

EXPERIENCE

Gateway Software Solutions – Flutter Developer

November 2024 – December 2025

- Developed and deployed cross-platform apps across Android, iOS, and desktop platforms.
- Specialized in Flutter architecture, state management, and API integration.
- Contributed to end-to-end development cycles including design, testing, and deployment.
- Recognized for delivering production-ready applications with clean, scalable code.
- Improved app responsiveness and user experience through optimized widget rendering and code organization.
- Supported team collaboration by implementing structured workflows and maintaining high code quality.

EDUCATION

Bachelor of Engineering in Computer Science and Engineering

2021 – 2025 | Coimbatore

Sri Ranganathar Institute of Engineering and Technology - CGPA: 7.8

TECHNICAL SKILLS

- Programming Languages:** Dart, Python
- Frameworks & Tools:** Flutter, Android Studio, VS Code, PyCharm
- Platforms:** Android, iOS, Web, Windows, macOS, Ubuntu, Linux
- API Handling:** REST API integration
- Databases:** Firebase Firestore, Firebase Storage, SQLite
- Authentication:** Firebase Authentication, Google Sign-In
- Tools & IDEs:** Android Studio, Visual Studio Code, PyCharm
- Version Control:** Git, GitHub

PROJECT

BookYourTurf – Real-Time Turf Booking App (Published on Play Store)

Role: Flutter Developer

Tech: Flutter, Dart, Firebase (Auth, Storage, Firestore), Provider, REST APIs

- Built a real-time turf booking system with secure role-based login for Users and Owners using Firebase Authentication & Firestore.
- Implemented responsive UI and dynamic dashboards for smooth user navigation.
- Enabled instant turf slot booking, live updates, and media uploads using Firestore listeners.
- Improved performance using optimized queries and clean architecture with Provider state management.
- Managed Play Store release including build optimization, app signing, and crash-free stability.
- Ensured data protection through Firestore security rules and controlled access.
